

## **TMF Florida ... Seeking Long-Term Trade Relations with EU Importers / Distributors / Wholesalers / Representatives**

The recent **Trade Agreement** (Organic Equivalence Cooperation Agreement OECA) between the **US** and **EU**, signed on February 15, 2012, and in effect since June 2013, has increased considerably, the opportunities for lucrative new trade relations, partnership opportunities and product introduction on both major world markets.

These developments have afforded [TMF Florida](#) the encouragement to intensify efforts in introducing a much needed new brand, with improved business and logistical models, in trading perishable and non-perishable goods on the international markets. Favorable developments, such as, the projected increased demand on the EU market of over 7.8% in 2013, offers TMF Florida the opportunity to establish strong and lasting relationships at the beginning of this new trade era.

[TMF Florida](#) is actively seeking **Trade Representation / Partnerships** for items in our perishable and non-perishable product lines. TMF trades primarily in fresh fruits - tropical and sub-tropical fruits, popular mainstream Western fruits and citrus ... as well as, fruit juices, mushrooms, ginger, sweet potato, nuts, spices, wine, raw honey, extra virgin olive oil (highest grades).

TMF produce will primarily come from the tropical and sub-tropical regions of Florida, Caribbean, South America and Central America. TMF also has production and trade partners in Europe, Asia and African Continent. Many of our farm sources offer optimal climates and highly-fertile, nutrient-rich soil ... uncontaminated by modern farming chemicals.

- TMF Florida DOES NOT buy, sell, grow or support genetically modifies (GMO) foods.
- TMF is partnered exclusively with **Toll Global Forwarding (TGF)** ... one of the largest global perishable goods transportation companies in the world ... to optimize logistics to and from all major world ports and trade destinations, by land, air and sea freight.
- Innovative refrigeration technologies and packing techniques are employed to reduce perishability during the transportation process ... thus, substantially extending the trade life of the product.
- TMF makes possible the trade flow in both directions ... imports to the US and international exports.
- By working through the **US Trade Ex-Im Bank**, TMF Florida is offering its partners the ultimate logistical and financial trade advantages not available from any other sources worldwide, such as, comfortable payment options, reduced banking fees, high insurance security, secured lines of credit, and secured and swift release of funds upon contract completion.

The TMF brand and product lines represent a major contribution to the new wave of healthier lifestyles sort by consumers in the Western world. All studies clearly indicate the trend for improved nutrition in the future.

Our websites [www.TMFflorida.com](http://www.TMFflorida.com) (consumer / commercial) and [www.TropicalMedicalFruits.com](http://www.TropicalMedicalFruits.com) (commercial), offer nutritional information and research for health-conscious consumers ... and marketing strategies to commercial partners.

An enormous pool of scientific / medical / nutritional studies has been concentrated on our unique scientific research website [www.Nutritionomics.com](http://www.Nutritionomics.com) ... dedicated to the most sophisticated and information-hungry end consumer.

We require **EU Representation / Partnerships**, preferably, with wholesale capabilities. If your company or distribution network is interested in any of our products, or would like to enquire about our potential to accommodate products not listed, please consult with us to open a dialog of mutual benefits. In reciprocity, TMF Florida can represent your product line(s) on our national and international markets, if your business plans indicate the need of such action.

With kind regards,

**Dr. Florian Braich,**
